PROFESSIONAL SUMMARY

Dependable student with strong work ethic and project leadership abilities seeks opportunity in surveying role. Solid IT, numeracy and literacy skills with excellent costing abilities for accurate, reliable reporting and forecasting. Methodical professional with strong mathematical and design skills and interest in geography. Plans projects, conducts research and compiles results into accessible reports. Focused on accuracy, organisation and planning for neat and orderly work processes.

WORK HISTORY

LAND SURVEYOR, 06/2018 - 08/2022

Mittausgroup Oy, Helsinki, Uusimaa

- Evaluated workloads and available resources to prepare schedules and inventory.
- Coordinated survey activities and oversaw field operations.
- Made proactive adjustments to policies and procedures to meet changing demands.
- Gathered, organised and modelled data for reports and presentations.
- Performed field calculations to complete assessments.
- Used computer software to create detailed maps.
- Followed local, regional and national guidelines.
- Measured and marked property guidelines and key features.
- Read and utilised topographical data to complete analysis of land.
- Inspected and surveyed proposed sites against suitability requirements.
- Developed policy implementation strategies for civil engineering tasks.
- Maintained up-to-date knowledge of current legislation for guaranteed project compliance.
- Performed field research to assess proposed construction methods.
- Used safety equipment, measuring instruments, and technical drawing software across different project stages.
- Checked designs for potential risks and non-conformance issues with health and safety regulations.
- Controlled flow of traffic, observing signals from other crew members to ensure optimal coordination.
